# Windshield Washer Switch Upgrade Kit

*by* **Q-LO**

Installation instructions · **Fits switch** `141 955 517`

**Purpose:** To allow the factory switch to operate an electrical water reservoir for the windshield wipers.

## What you need

| Part | Qty |
|---|---|
| Switch adapter with push button and wires, rated 1 A max | 1 |
| M2.5 screw (long enough for switch + adapter) | 2 |
| M2.5 flat washer | 2 |
| M2.5 pressure washer | 2 |
| M2.5 nut | 4 |

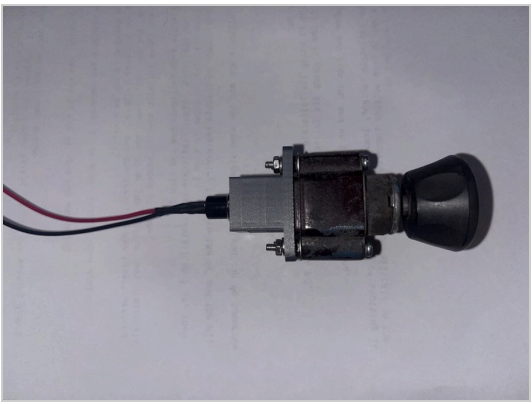

**Tools:** drill, small wrench or nut driver, screwdriver.

**Check that all items are in the bag before you start.**

**Before**

**After**

## Installation

1. Remove one of the two rivets on top of the switch.

   > ⚠ **WARNING: Do not remove both rivets at the same time. The switch can fall apart.**

2. Install one screw from the front of the switch to the back. Add one flat washer and a nut. Secure the nut.
3. Repeat steps 1 and 2 on the second rivet.
4. Install the switch adapter with the logo reading normal.
5. Secure the adapter with two pressure washers and two nuts.
6. **You are done.**

> **Electrical limit:** the push button is rated **1 A maximum**. Use it only to switch a relay coil (about 0.15 A). Never wire the washer pump straight through the button.
